IRON RATS Custom – Physical Data Model(Draft)

Admin

password: String,
mailbox: String

Color_Theme

name: String,
background: String,
font: String,
navigationBackground:String,
navigationFont: String

Product

Name: String,
Type: String,
description: String,
price:String,
Images: [{
         imageId: String,
         name: String,
         path: String
}],
createdTime: {
         type: Date,
         default: Date.now
},
updateTime: {
         type: Date,
         default: Date.now
},
timestamps: {
         createdAt: 'createTime',
         updatedAt: 'updateTime'
}

Message

customerId: String,
senderEmail: String,
receiverEmail: String
senderName: String,
receiverName: String,
customerPhoneNumber: String,
message: String,
messageType: {
         type: String,
         enum: ['Send', 'Receive']
}
createdTime: {
         type: Date,
         default: Date.now
},
timestamps: {
         createdAt: 'createTime'
}

Appointment

name: String,
email: String,
phoneNumber: String,
appointmentDate: Date,
appointmentStartTime: Date,
appointmentEndTime: Date,
description: String,
confirm: Bool,
createdTime: {
         type: Date,
         default: Date.now
},
timestamps: {
         createdAt: 'createTime'
}

Recruitment_Info

jobTitle: String,
jobType: {
         type: String,
         enum: ['Full-Time, 'Part-Time']
},
jobDescription: String,
qualification: String,
salary: String,
createdTime: {
         type: Date,
         default: Date.now
},
timestamps: {
         createdAt: 'createTime'
}

Note: customerId in Message is a random id created by system when a user visits the website
